Rain during the week 49-hundth, of an inch. The temperature for the nights or early mornings is not given in our abstract. On Thursday morning, May 2, at surrising, about five o'clock, the mercury indicated 29 degress-being 3 below the freezing point, and 7 degrees is long after sunress. In the winter, or when the sun rises at or after seven, this period of time is about as cold as any portion of the night. It is presumed that the farmers have informed you that the prospect for peaches has been materially diminished in this region, as also the grape, by the frost of the 2d of May.

Legislative Summary.

MONDAY. April 29, 1861. SENATE.-The report of the Adjutant General was laid before the Senate. Mr. Wolf called up House joint resolution No. 1, and offered an amendment to the effect that the men and money of Indiana should not be employed in an aggressive war, and that a general convention of all the States be recommended by this General Assembly. It was referred to the Committee on Fede ral relations. Mr. Steele also submitted resolutions which were also referred to the same committee. Mr. Studabaker, from the Committee on Finance, returned the bill for the defense of the State with amendments, which were concurred in. This bill appropriates \$500,000, and provides

for five regiments. Is was recommitted. Senator Wagner's bill was returned from the Military Committee, authorizing the formation of six regiments, to be of the companies already reported-to be divided into cavalry, artillery and infantry, as the Governor may direct-to serve for one year, unless sooner discharged; and authorizing the creation of two brigadier-generals. The bill was amended so as to make the pay three fourths of that allowed in the regular army, nance. and the word cavalry was stricken out, in which shape it passed.

It is combined from the most active remedials that have been discovered for the expurgation of the foul disorder from the blood, and the rescue of the system from its detructive consequences. Hence it should be emloyed for the cure of not only Scrofula, but also hose other affections which arise from it, such S ERUPTIVE and SKIN DISEASES, ST. ANTHONY'S FIRE, ROSE, ERYSIPELAS, PIMPLES, PUSTULES, BLOTCHES, BLAINS and BOILS, TUMORS, TETTER nd SALT RHEUN, SCALD HEAD, RINGWORM, RHEUMATISM, SYPHILITIC and MECURIAL DIS-EASES, DROPSY, DYSPEPSIA, DEBILITY, and, indeed, ALL COMPLAINTS ARISING FROM VITIATED OR IN-PURE BLOOD. The popular belief in "impurity of the blood" is founded in truth, for scrofula is a degeneration of the blood. The particular purpose and virtue of this Sarsaparilla is to purify and regenerate this vital fluid, without which sound health is impossible in contaminated constitutions.

MEDICAL.

Scrofula, or King's Evil, Is a constitutional disease, a corruption of the blood, by which this fluid becomes vitiated, weak and poor. Being in the circulation, it pervades the whole body, and may burst out in disease on any part of it. No organ is free from its attacks. nor is there one which it may not destroy. The scrofulous taint is variously caused by mercurial fisease, low living, disordered or unhealthy food. impure air, filth and filthy habits, the depressin vices, and, above all, by the venereal infection. Whatever be its origin, it is hereditary in the constitution, descending "from parents to children usto the third and fourth generation:" indeed, it seems to be the rod of Him who says: "I will visit the iniquities of the fathers upon their chil-

Its effects commence by deposition from the blood of corrupt or ulcerous matter, which, in the lungs, liver and internal organs, is termed tu bercles; in the glands, swellings; and on the sur face, eruptions or sores. This foul corruption, which genders in the blood, depresses the energies of life, so that scrofulous constitutions not only suffer from scrofulous complaints, but they nave far less power to withstand the attacks of other diseases; consequently vast numbers perish by disorders which, although not scrofulous their nature, are still rendered fatal by this taint in the system. Most of the consumption which ecimates the human family has its origin directly in this scrofulous contamination; and many destructive diseases of the liver, kidneys, brain, and indeed, of all the organs, arise from or are ag ravated by the same cause. One quarter of all our people are scrofulous their persons are invaded by this lurking infec tion, and their health is undermined by it. To leanse it from the system we must renovate the lood by an alterative medicine, and invigorate

it by healthy food and exercise. Such a medicine

This "Curn" expels the poison from the blood, and consequently cures them all alike. It is an invaluable protection to immigrants and persons traveling or temporarily residing in the malarious districts. If taken oceasionally or daily while exposed to the infection, that will be excreted from the system, and can not accumulate in sufficient quantity to ripen into disease. Hence it is even more valuable for protection than cure, and few will ever suffer from Intermittents if they avail themselves of the pro-

AT LITTLES HOTEL. Where he will be happy to meet all those afflicted withany kind of disease and considered incurable by other practitioners. His remedies are only those which nature has so bountfully provided us with. In the treatment of disease he rejects the use of all poisonous drugs and minerals. Instead of enfeebling the system he invigorates, that nature may be able to expel the disease. It is to the knowledge of those great secrets that he owes his successand in using which he defles all the Medical Faculty on the Continent to compete with him. All those who are suffering from Lung Diseases of whatever nature, are particularly desired to call, as one-half of the cases of consumption that are pronounced incurable by the Medical Faculty, and considered hopeless, are readily cured, any yield at once to his mild plan of treatment, from the very fact that not one physician in twenty have the proper in-

The idea that consumption is necessarily fatal has destroyed more brunan life than the disease itself.

For all forms of Dyspepsia and Kidney Diseases he tests the urine, for the excesses deposited, which is the suipossible plan to ascertain the true cause of disease. To Males and Females of Youth and Maturity. Seminal Weakness and Spermatorrhora, it is a melancholy fact that theusands who are suffering under pale and insatiate disease are victims of secret habit, self abuse, gradually undermining their constitution—the disease is sidiously crooping on, every faculty is shirtered, constitution wrecked, and they become subject only for a hospital r mad-house, unless death comes in as a welcome guest to relive the patient from his suffering, and his friends from the painful evidence of his irregularities and errors. The penalty will not cease with the transgression; the constitution has received the shock, and nature, unaided can not repair the jointy. The only escape is former prompt and proper medical treatment. The earlier this is sought the easier the cure. Generally the first symptom males, are noctural and cometimes diurnal emissions.
